### COMMUNITY

## Society Hub

Complete society accounting solution with member billing, member receipts management and GST compliance.

---

### Key Features

---

- Complete accounting solution with member billing, member receipts management along with latest GST amendments
- Built on Microsoft .Net front end & Microsoft SQL Server back end
- Separate society-wise separate databases
- User wise login & rights assignment — only authorized users can access, add, edit or delete respective entry modules & reports as per allotted rights
- Multiple screen/window at a time can be opened, kept open & switched from one to other unlike Tally
- Excel functionalities in all grids — filtering, column swapping, hide/unhide, wrap/un-wrap, sorting, summary view with subtotal, and grid reports with detail & summary options
- Unique one-click auto entry module to generate random & multiple entries at one shot
- Alt+2 duplicate entry shortcut
- Multiple account/member details edit in one screen
- Automatic narration for member receipts, from master or previous entry
- Merging option for accounts
- One click delete option for non-required account master records
- Bulk SMS option (integration on demand) and direct e-mail sending of reports, with PDF/Excel/E-mail buttons in reports
- Statistics report for user wise work/entry done
- Scan, attach & view support documents for accounting entries, keeping bills/vouchers alongside regular accounting entries
- Ctrl+D to see entry creation/modification history

### Menu-wise Features

---

- **Installation:** create a new society/database with default records; new year and society master setup with KYC, PAN & GSTIN details, billing head configuration, receipt adjustment rules, balance confirmation letter customization, rebate rules

- **One Time Input:** opening balance accounts, opening BRS (bank reconciliation), opening FD information, budgeting with year-over-year % adjustment, society committee master, parking charges master, society-wise billing head master
- **Miscellaneous:** create & migrate society from Access MDF file, split society into two years, create special web users for manager/accountant mobile & web app access
- **Masters:** user master, web user master, account master (create/alter/delete, bulk detail edit, bulk import from Excel), member module (bulk billing amount update by fixed amount/percentage/rate per sq ft, member transfer with balance carry-forward), final account heads, account groups, narration master
- **Mail Settings:** SMTP, password & signature text configuration

## Technical Details

---

- Front End: Microsoft .Net
- Back End: Microsoft SQL Server
